

# CD30-POSITIVE LYMPHOID MALIGNANCIES

## THIRD WORKSHOP

6-8<sup>TH</sup> FEBRUARY 2017  
SANTANDER  
SPAIN

### Third Workshop on CD30-Positive Lymphoid Malignancies

Santander- Hospital Universitario Marqués de Valdecilla. Spain

6-8<sup>TH</sup> FEBRUARY 2017

---

This is an educational activity, developed by the Pathology Service in the Hospital Universitario Marques de Valdecilla and supported by a grant from TAKEDA, designed to improve the diagnostic capacity of haematopathologists across the world, with special focus in Asia, Latinoamerica, Africa, Australia and East-Europe

This February 6-8<sup>th</sup> Workshop is the third of a series of Workshops, where we are addressing the diagnostic criteria for the recognition of CD30-positive malignancies -Hodgkin lymphoma, Gray-zone lymphoma, Anaplastic Large Cell Lymphoma and cutaneous CD30 positive disorders- through a combination of:

- Introductory talks.
- Discussion of a reference case collection, previously accessible through digital slides.
- Joint discussion on multiheaded microscopes of consultation cases, previously provided by the participants.

A maximum of 20 pathologists are expected to participate in each of the Workshops.

# CD30 POSITIVE LYMPHOID MALIGNANCIES

## THIRD WORKSHOP

6-8<sup>TH</sup> FEBRUARY 2017  
SANTANDER  
SPAIN

### PROGRAMME

#### 6<sup>th</sup> February

08:30-08:45: Welcome and introduction. M Piris

08:45-09:45: Requisites for lymphoma diagnosis. M Piris

09:45-10:45: Study of reference cases. I session: Nodal CD30 lymphoproliferative disorders. S Montes. I part.

10:45-11:00: Coffee

11:00-13:00: Study of reference cases. I session: Nodal CD30 lymphoproliferative disorders. S Montes. II part.

1300-1400: Visit to the Pathology Dept, Immuno lab

14:00-15:00: Lunch

15:00-16:00: CD30 expression, from biology to clinics. J Nunez-Cespedes

16:00-18:00: Joint discussion on series of cases provided by the attendants.  
Chaired by S Montes

#### 7<sup>th</sup> February

08:45-09:45: CD30+ lymphoproliferative disorders. M Piris

09:45-10:45: Study of reference cases. II session: the gray zone around Hodgkin lymphoma. I part. M Piris

10:45-11:00: Coffee

11:00-13:00: Study of reference cases. II session: the gray zone around Hodgkin lymphoma. II part. M Piris

1300-1400: Digital pathology. GE

14:00-15:00: Lunch

15:00-16:00: Immunohistochemistry lab. S Montes

16:00-18:00: Joint discussion on series of cases provided by the attendants  
Chaired by M Piris

#### 8<sup>th</sup> February

08:45-09:45: Molecular diagnosis lab, IGH and TCR analysis. S Montes

09:45-10:45: Study of reference cases. III session: Extranodal CD30+ lymphoproliferative disorders. I Part, C Gonzalez-Vela

10:45-11:00: Coffee

11:00-13:00: Study of reference cases. III session: Extranodal CD30+ lymphoproliferative disorders. II Part, C Gonzalez-Vela

13:00-1400: FISH and other cytogenetic studies in lymphoma diagnosis. A Batlle

14:00-15:00: Lunch

15:00-16:00: Somatic mutation analysis. NGS. I Varela, U Cantabria

16:00-18:00: Special Slide seminar; C Celeiro
