MDG-18-10808	Acceso a bases de datos de referencia Bibliográfica multidisciplinares con citas e impacto	Ayuda para impulsar y favorecer la investigación de excelencia promoviendo el uso de bases de datos de referencias bibliográficas multidisciplinares con citas e impacto que permitan una óptima gestión y medición de resultados de investigación.	12	11.698,18	85%	NO
PL00001/2019	Subvención del programa de Prácticas Laborales en empresas, fundaciones y otras entidades del sector público de la Comunidad Autónoma de Cantabria	Generar oportunidades de prácticas profesionales en régimen laboral, a personas jóvenes cualificadas, a través de contratos en prácticas (o aquella modalidad que pueda sustituir a esta en el futuro),	12	30.911,56	100%	NO
EU20/08	EIP on AHA Twinings 2020: digitally-enabled innovative practices knowledge exchange	<p>1.The desirable goal of the twinning project is to develop a concrete proposal for a pilot with the Emma platform in Cantabria. Including the finding of financial resources to implement the pilot into a concrete research proposal.</p> <p>2.Know-knowledge transfer practices bidirectional. Sharing best practices in digital health facilitating the deployment of digitally-enabled innovative solutions for health and care delivery for older adults and patients with chronic diseases.</p> <p>3.Improving the individualized plan of care for people with a chronic disease and general population. Planning a pilot will give both of us insight into the acceptability and the difficulties that may arise when implementing/scaling an innovation to a new region/country.</p> <p>4.Network generation for future technological innovation projects in the health care area.</p> <p>5.Learning about the different points of view on the specifics a platform/application should have and the ways in which our regional/national systems work.</p>	5	5.000,00	100%	NO
EU20/03	ALADDIN - Development of a Specific Training on Additive Manufacturing Technologies for Hospitals	ALADDIN aims to contribute to the integration by developing a specific training on AM in Hospitals, as health cornerstones they will have a multiplying effect in the whole Health System, for two key players identified for the European value chain on AM medical devices: health professionals working in hospitals (doctors, surgeons, biotechnologists, ...) and engineering students for their future incorporation into the health sector.	24	37.076,00	100%	NO
